Junction City Union: A live newspaper, edited as it should be, is not a bad thing for a town. Few people seem to appreciate it, but a town on the outside is sized up at once by its papers. A poor sheet does any country or city incalculable injury, and is always an expensive luxury. Business men value this point too lightly. It is a matter of self-protection to the good name of a city. The good paper should be patronized, and the third-rate concern should be sent elsewhere.

Allen county, being known everywhere to be prosperous, is fairly infested with peddlers and patent-right men and every other kind of fakir. The thing for the people to do is to have no dealing with any of them. No matter how plausible their bait looks, don't bite, for if you do you will get caught. You can get everything you want or need from men who are regularly in the business right here in Allen county, men who pay taxes here, who have good reputations and who are entirely responsible for every thing they sell you. Why then should you patronize a man who does not pay taxes here, who has no reputation and from whom you could never recover a penny no matter how badly he cheated you? The safe thing to do is to trade with the men you know.
